

5 things I can do for the bees

I plant or sow honey plants on balconies, terraces and gardens for decorative purposes.

At home on the balcony, terrace or garden, I put up a **nesting box for bees** – I can do it myself or buy it.

I avoid mowing grass during the peak flourishing of plants and **mow grass in the evening hours**.

I use pesticides that are harmless to bees and I spray plants in windless weather conditions early in the morning or late in the evening, when bees are back to their hives.

I raise children's and teenagers' awareness about importance of the bees.

Honey plants in our backyard

fruit trees sage oregano
peppers mint
pumpkins melissa rosemary
blueberries acacia strawberries
thyme lavender linden
spruce fir basil
tomatoes maple
currant
rosacea
