At the Ministry of Defence and its constituent bodies, we emphasize the responsible management of the environment and energy. As an organization, we will continue to:

- improve the operational capabilities and resilience of the defence system and the protection and rescue system through environmentally responsible and energy-efficient approaches;
- apply the principles of prudent energy management and responsible environmental stewardship within the Alliance, the EU Civil Protection Mechanism, and other forms of international cooperation;
- actively maintain an open and trustworthy dialogue with industry, research organizations, local and wider communities, and other stakeholders both domestically and internationally;
- develop an appropriate framework for achieving environmental and energy objectives in accordance with legislative and other requirements and with efforts to achieve carbon neutrality by 2050;
- use energy and material resources responsibly and efficiently, thereby reducing negative impacts on the environment;
- monitor and evaluate the results of environmentally and energy-efficient solutions in accordance with international standards and other requirements for the implementation and maintenance of the environmental and energy management system;
- procure and use material and energy-efficient resources and services necessary for our operations and the fulfilment of our mission;
- actively promote research, development, and sustainability projects in the fields of energy efficiency and environmental protection;
- enhance digital support for data collection, analysis, and the use of materials and energy, enabling a more efficient and sustainable energy supply and a safer environment;
- promote environmental and energy awareness, professional development, competence building, and an appropriate organizational culture among employees;
- strengthen awareness that every individual can contribute to change;
- serve as an example to others through our efforts and achievements in the broadest sense of social responsibility
