

Council conclusions on skills and competences for the green transition

Adopted by the Council on 7 March 2023

High on the political agenda

Council recommendation 2022 on learning for the green transition and sustainable development

European Council February 2023

European Year of Skills

- The green transition can only succeed if the EU has the skilled workforce for it.
- The skills and competences required for the green transition are diverse in nature and continue to emerge.
- Education and training providers have a key role to play.

→ **upskilling and reskilling**
