Politične usmeritve predsednice Komisije Ursule von der Leyen:

*"Konkurenčnost Evrope bo odvisna od začetka nove dobe iznajdljivosti in iznajdljivosti. To zahteva, da se **raziskave in inovacije, znanost in tehnologija postavijo v središče našega gospodarstva** ... V ta namen bomo **razširili Evropski raziskovalni svet in Evropski svet za inovacije.**"*

Nekaj besed Maria Draghija:

*"Najprej in kar je najpomembneje – mora Evropa temeljito preusmeriti svoja skupna prizadevanja v **zapolnitev inovacijske vrzeli** z ZDA in Kitajsko, zlasti na področju **naprednih tehnologij.**"*

*"Podpora javnega sektorja raziskavam in inovacijam je neučinkovita zaradi **pomanjkanja osredotočenosti na prelomne inovacije in razdrobljenega financiranja**, kar omejuje potencial EU, da doseže obseg na področju prodornih tehnologij z visokim tveganjem."*

*"Univerze in druge raziskovalne ustanove so **osrednji akterji v zgodnjih fazah inovacij**, ustvarjajo prodorne raziskave in ustvarjajo nove profile znanj in spretnosti za delovno silo."*

Novosti v sklopu EIC Pathfinder 2025

EIC Pathfinder: ključne značilnosti

- **temeljne raziskave (TRL 1 – 4)** radikalno novih tehnologij & prelomnih inovacij, ki izvirajo v odlični znanosti in raziskavah
- **Kriteriji („Gatekeepers“):**
 - Prepričljiva in dolgoročna vizija radikalno nove tehnologije, ki ima potencial za transformativno pozitiven učinek na gospodarstvo in družbo
 - Konkreten, nov in ambiciozen znanstveni preboj & high-risk, high-gain“ raziskave

EIC Pathfinder Challenges: Merilo učinka – sprememba!

- **Potential Impact:** How **credible** are the pathways **to achieve** the **expected outcomes** and **impacts** of the Challenge? To **what extent** would the successful completion of the project **contribute** to this?
- **Innovation potential:** **How realistic is the proof of principle for demonstrating the potential impact of the technology for the challenge?** How **adequate** are the **proposed measures** for **protection of results** and any other **exploitation measures** to facilitate future translation of research results into innovations with positive societal, economic or environmental impact? How suitable are the proposed measures for involving and **empowering key actors** that have the potential to take the lead in translating research into innovations in the future?
- **Communication and Dissemination:** How **suitable** are the proposed **measures**, including communication activities, to maximise expected outcomes and impacts for raising awareness about the project results' potential to establish new markets and/or address global challenges?

EIC Pathfinder Challenges:

Biotech for Climate Resilient Crops and Plant- Based Biomanufacturing

Proposals should work on **both specific objectives:**

1. Increasing plant growth, yields and resistance to stress through:

- i. Enhancing tolerance to stress combinations occurring due to different climate scenarios
- ii. Increasing water use efficiency and nutrient use efficiency compared to current crops in commercial use
- iii. Improving plant reproduction and seed filling processes under unfavourable conditions caused by combination of at least two stress factors
- iv. Investigating and enhancing plant and soil microbiome interactions

2. Substantially increasing the nutritional value (e.g. proteins, vitamins) in crops through plant native and non-native ingredients in crops.

Promotional video

EIC Pathfinder Challenges:

Generative-AI based Agents to Revolutionize Medical Diagnosis and Treatment of Cancer

Each proposal should focus on one (and only one) of the following diseases: breast cancer, cervical cancer, ovarian cancer, prostate cancer, lung cancer, brain cancer, stomach cancer or colorectal cancer. All proposals should address both technological areas:

- **Area 1: Technological area**

- GenAI-based tools for Integrating Multidimensional Multimodal health Data
- Medical Data Augmentation
- Medical Knowledge Representation and Integration

Promotional video

- **Area 2: Clinical Area**

- Predictive Diagnosis
- Enhance Personalized Treatment Selection

EIC Pathfinder Challenges:

Towards autonomous robot collectives delivering collaborative tasks in dynamic unstructured construction environments

Each funded project shall deliver the following 3 specific objectives:

- **Objective 1:** Development of a simplified structural, load-bearing, material-robot building system to assemble a representative and future-relevant structure (pavilion) using a multitude of discrete modules (elements, segments, blocks, voussoirs). Solutions are expected to incorporate “design-for-robotic-assembly” aspects, such as the robot-material interfaces, module interfaces and connectors, and may include innovative approaches such as embedded sensing in the modules.
- **Objective 2:** Development of an autonomous mobile multi-robotic collaborative platform using at least two, preferably more, mutually aware collaborative robotic systems specifically designed for the assembly tasks outlined in Objective 1.
- **Objective 3:** Achieve a TRL4 demonstration of an autonomous assembly sequence using the demonstration building system developed in Objective 1, executed by the autonomous mobile multi-robotic collaborative platform developed in Objective 2.

Promotional video

EIC Pathfinder Challenges:

Waste-to-value devices: Circular production of renewable fuels, chemicals and materials

Proposals should address **one (and only one)** of the following focus areas:

Area 1: Fully integrated waste-to-value devices

- (i) Fully integrated solar reforming or synthetic biology devices
- (ii) Integrated capture and conversion technologies
- (iii) Membrane-based and electrochemical brine mining technologies
- (iv) Ex-situ remediation devices based on microbial/enzymatic and/or photocatalytic degradation

Promotional video

Area 2: Understanding underlying mechanisms by means of computational material science and AI

Area 3: Cells from scratch by means of bottom-up synthetic biology

EIC Pathfinder: Brezplačen pre-screening

prijava med 60 in 30 koledarskimi dnevi pred rokom za oddajo

1. Registracija na portalu wideraexperts.eu (brez izpolnjenega obrazca B)
2. NKT pridobi eksperta, ki bi lahko izvedel predhodni pregled
3. Pripravite predlog za predhodni pregled projektne prijave in se dogovorite z NKT in ekspertom glede časovne dinamike posredovanja projektne predloga (obrazec B), konzultacij preko spleta itd.
4. Ekspert izvede storitev predhodnega pregleda projektne predloga (pre-screening)
5. Vi prejmete priporočila eksperta
6. Izpolnite vprašalnik o storitvi, ki NKT omogoča, da oceni ali je bila storitev strokovnjaka ali strokovnjakinje v skladu s pogodbo, dogovorjeno med strokovnjakom ali strokovnjakinjo
7. Ocenite eksperta v portalu

EIC Transition: novosti delovnega programa 2025

- Povečano število prijaviteljev vabljenih na intervju
- Komisija bo lahko priporočila "GO reserve" za financiranje projektov v primeru razpoložljivosti dodatnih sredstev.
- Pečat odličnosti (**Seal of Excellence**) bo dodeljen vsem prijavam, ki dosežejo evalvacijski prag, vendar ne prejmemo financiranja zaradi pomanjkanja razpoložljivih sredstev (prej je to veljalo le za prijave MSP z enim upravičencem). Če je prijava oddana s strani konzorcija, bo Pečat odličnosti **dodeljen koordinatorju**, z navedbo vseh ostalih sodelujočih partnerjev.

EIC Transition: Slabosti in prednosti prijav

Lekcije iz NoGo prijav:

Poznavanje trga, na katerega nameravate vstopiti
Poznavanje konkurence, s katero se boste soočili
Poznavanje problema, ki ga naslavljate

Uspešne prijave izpostavijo:

Prelomnost inovacije z visokim komercialnim potencialom
Kompetentno ekipo za razvoj tehnologije in njeno uvedbo na trg
