The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the **Technical Meeting on Developments in Non-Radiocarbon Accelerator Mass Spectrometry Techniques and Relevant Applications** (hereinafter referred to as "event") to be held virtually via Cisco Webex from **11 to 14 October 2021**.

The purpose of the event is to review progress made in new applications of accelerator mass spectrometry techniques in environmental monitoring, human health studies and nuclear safety.

The attached Information Sheet provides further details of the event.

The event will be held in English.

Member States are invited to designate one or more participants to represent the Government at this event. Member States are strongly encouraged to identify suitable women participants.

Designations should be submitted to the IAEA through the competent national authority (Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) not later than **6 September 2021** using the attached Participation Form (Form A). Completed and authorized Participation Forms should be sent either by email to: Official.Mail@iaea.org or by fax to: +43 1 26007 (no hard copies needed). Copies should be sent by email to the Scientific Secretary of the event, Mr Sotirios Charisopoulos, Division of Physical and Chemical Sciences, Department of Nuclear Sciences and Applications (Email: S.Charisopoulos@iaea.org), and to the Administrative Secretary, Ms Ragdaa Attia (Email: R.Attia@iaea.org). The Scientific Secretary of the event will liaise with the participants directly concerning further arrangements, as appropriate, once the official designations have been received.

Should Governments wish, in addition, to appoint one or more observers to assist and advise the designated participants, they are kindly requested to inform the IAEA of the names and contact details of any such observers by the above date.

The IAEA takes no responsibility for, and the provider of the virtual meeting services has represented and warranted that the Services shall not contain, and that no end user shall receive from the software used to hold the virtual meeting, any virus, worm, trap door, back door, timer, clock, counter or other limiting routine, instruction or design, or other malicious, illicit or similar unrequested code, including surveillance software or routines which may, or is designed to, permit access by any person, or on its own, to erase, or otherwise harm or modify any data or any system, server, facility or other infrastructure of any end user (collectively, a "Disabling Code").

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to renew to the IAEA's Member States the assurances of its highest consideration.

Technical Meeting on Developments in Non-Radiocarbon Accelerator Mass Spectrometry Techniques and Relevant Applications

Virtual Event

11–14 October 2021

Ref. No.: EVT1904256

Information Sheet

Introduction

Accelerator Mass Spectrometry (AMS), initially developed at low-energy nuclear physics laboratories in the late 70s - beginning of 80s, has been proved to be not only an ultra-sensitive technique for counting individual atoms but also an accelerator-based method with a vast potential for analytical applications related to problems of modern society. Nowadays, AMS is used in archaeology, biomedicine applications, climate change studies, environmental monitoring, hydrology and oceanography, nuclear safeguards, forensics, and many other fields of increased societal and economical interest.

AMS is used to detect radionuclides and stable nuclides with very low concentrations, between 10^{-12} and 10^{-16} . In contrast to other methods, AMS requires much shorter measuring times, typically less than one hour, as well as much smaller amounts of samples, often at sub-milligram range. The most widely employed isotope is radiocarbon (^{14}C), which used by at least 85% of the analyses performed in AMS laboratories. Besides radiocarbon, the use of other isotopes, such as ^{10}Be , ^{26}Al , ^{36}Cl , ^{41}Ca , ^{129}I , or U and Pu isotopes is continuously increasing, due to their unique analytical capabilities for a wide spectrum of applications.

The present Technical Meeting on Developments in Non-Radiocarbon Accelerator Mass Spectrometry Techniques and Relevant Applications is driven by the need to promote the unique analytical capabilities of non-radiocarbon AMS, disseminate the relevant knowledge and expertise and advancing technologies

to IAEA Member States together with AMS's large potential for contributing to their socio-economic development.

Objectives

The purpose of the event is to:

1. Review progress made on the technologies associated with the sample preparation and subsequent use in AMS of radioisotopes besides radiocarbon.
2. Review technological developments and achievements at AMS laboratories using radioisotopes besides radiocarbon.
3. Discuss current and emerging applications based on anthropogenic and cosmogenic radioisotopes apart from radiocarbon.
4. Record training needs in the field addressed by the Technical Meeting, especially for scientists from developing countries
5. Collect and evaluate scientific information for the preparation of an IAEA TECDOC, if required.
6. Identify special research and development topics of common interest for the participants to assess the need of initiating an IAEA Coordinated Research Project (CRP)

Target Audience

This technical meeting is addressed to experts and stakeholders from IAEA Member States as well as scientists from industry

Working Language

The working language of the meeting is English; no interpretation will be provided.

Expected Outputs

1. Meeting report including recommendations on the meeting objectives.
2. Layout of an IAEA TECDOC tentatively entitled "Developments in Non-Radiocarbon Accelerator Mass Spectrometry Techniques and Relevant Applications"

Meeting Structure

The meeting will start at 09:30 on **11 October 2021** and end by 16:30 on **14 October 2021**. It will feature invited and contributed oral papers presented in sessions devoted to special topics. At the beginning of the meeting, participants will elect a chairperson and a few rapporteurs who will take notes and coordinate the preparation of the draft meeting report.

Invited talks will be 35 minutes long followed by 5 minutes for discussion; contributed oral presentations will be 20 minutes long including 5 minutes for discussion. A summary session will provide the opportunity to review the progress reported at the meeting. Participants will then form working groups focusing on particular cases of interest and topics covered, in order to prepare the draft meeting report, which will be jointly reviewed and finalized by all participants before meeting closure.

Participants will be asked to contribute on voluntary basis to the publication of an IAEA TECDOC. For the preparation of the TECDOC, an editing committee to be coordinated by the Scientific Secretary of the meeting will be assigned by the participants. If agreed by the participants, a summary report of the meeting will be jointly prepared for submission to a scientific journal.

Topics

A non-exhaustive list of topics to be covered by the Technical Meeting is given below:

- Advanced accelerator systems for AMS with radioisotopes besides radiocarbon
- New and advanced AMS techniques
- Advances in sample preparation methods
- Current and emerging non-radiocarbon AMS applications
- Analytical requirements in terms of sensitivity and measurement precision
- New and Future Facilities
- Networking

Participation and Registration

All persons wishing to participate in the event have to be designated by an IAEA Member State or should be members of organizations that have been invited to attend.

In order to be designated by an IAEA Member State, participants are requested to send the **Participation Form (Form A)** to their competent national authority (e.g. Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) for onward transmission to the IAEA by **6 September 2021**. Participants who are members of an organization invited to attend are requested to send the Participation Form (Form A) through their organization to the IAEA by above deadline.

Selected participants will be informed in due course on the procedures to be followed with regard to administrative and technical matters.

Papers and Presentations

Participants who wish to give presentations are requested to submit an abstract of their work. The abstract will be reviewed as part of the selection process for presentations. The abstract should be in A4 page format, should extend to no more than 2 pages (including figures and tables) and should not exceed 1000 words (including author names, affiliations, and acknowledgments, if necessary). It should be sent electronically to Mr. Sotirios Charisopoulos, Scientific Secretary of the event (see contact details below), not later than **6 September 2021**. Authors will be notified of the acceptance of their proposed presentations by **20 September 2021**.

In addition, participants have to submit the abstract together with the **Participation Form (Form A)** and the attached **Form for Submission of a Paper (Form B)** to their competent national authority (e.g. Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) or their organization for onward transmission to the IAEA not later than **6 September 2021**.

Deadlines

6 September 2021	Deadline for submission of abstracts according to the instructions given above for paper selection
6 September 2021	Submission of Form A and Form B (if an abstract is to be presented) by the participant's Member State to the IAEA
20 September 2021	Notification of acceptance of contribution to participants sent by email
1 October 2021	Submission, by email, of invitation letters to participants
11 October 2021	Start of the Technical Meeting.

Participation Form

Technical Meeting on Developments in Non-Radiocarbon Accelerator Mass Spectrometry Techniques and Relevant Applications

Virtual Event

11–14 October 2021

To be completed by the participant and sent to the competent national authority (e.g. Ministry of Foreign Affairs, Permanent Mission to the IAEA, or National Atomic Energy Authority) of his/her country for subsequent transmission to the International Atomic Energy Agency (IAEA) either by email to: Official.Mail@iaea.org or by fax to: +43 1 26007 (no hard copies needed). Please also send a copy by email to the Scientific Secretary S.Charisopoulos@iaea.org and to the Administrative Secretary R.Attia@iaea.org.

Participants who are members of an invited organization can submit this form to their organization for subsequent transmission to the IAEA.

Deadline for receipt by IAEA through official channels: 6 September 2021

Family name(s): (same as in passport)	First name(s): (same as in passport)	Mr/Ms
Institution:		
Full address:		
Tel. (Fax):		
Email:		
Nationality:	Representing following Member State/non-Member State/entity or invited organization:	
If/as applicable:		
Do you intend to submit a paper?	Yes	No
Would you prefer to present your paper as a poster?	Yes	No
Title:		

Participants are hereby informed that the personal data they submit will be processed in line with the [Agency's Personal Data and Privacy Policy](#) and is collected solely for the purpose(s) of reviewing and assessing the application and to complete logistical arrangements where required. Further information can be found in the [Data Processing Notice](#) concerning IAEA InTouch+ platform.
