Table of Contents

CHAPTER 1 PREFACE

Thank you for using the Registration and Management System for Overseas Enterprises of Imported Food. In order to help you get started with this system immediately, we have developed this user manual.

With this manual, you can find information about installation steps, system configuration, basic operations, use of software and hardware, and safety precautions. When installing and using this system for the first time, please read this manual carefully, which will help you use this system more effectively.

This manual is designed for users with basic computer knowledge. At this time, we assume that you are already familiar with the Windows 7 / 10and mouse operation, and have the experience of using Google Chrome , 360 and other web browsers.

CHAPTER 2 INSTRUCTIONS FOR USE

2.1 Portal

The system is designed as a browser version, and its URL is: https://cifer.singlewindow.cn

2.2 System Requirements

2.2.1 Operating System

Windows 7 or 10 (32 Bit or 64 Bit operating system)

Windows XP is not recommended

2.2.2 Browser

Chrome 50 or above

2.3 Entry Requirements

2.3.1 Requirements For Entry

In the interface, the fields with * are mandatory, and those without * are optional. The fields with a grey background are not permitted to enter information. During the entry process, if a prompting tip in red pops up next to the field, it means that the information currently entered is not compliant with requirements. Please make modifications according to the prompt. The blue buttons in the interface are function keys.

* Legal Representative's Name:	* Legal Representative's Phone Number:		* Legal Representative's Email:	

Figure   Entry of Enterprise Profile (Partial)

2.3.2 Keyboard Operation

Some functions of the interface can be operated by keyboard shortcuts.

Click on the Tab key to make the interface cursor automatically jump to the entry box of the next field.

Click the Up and Down arrow keys to select from the parameters in the drop-down menu of the interface.

Click on the Backspace key to delete the content currently entered in the box.

2.4 General Functions

2.4.1 Moving Between Tabs

When multiple tabs are opened in the interface, please click the ◄◄ or ►► icons to move between the tabs.

2.4.2 Menu Collapsing / Expanding

Click on the display area on the right - click the icon 〒 in the upper left corner to collapse or expand the menu bar on the left. Once being collapsed, the left menu bar only displays icons, as shown in the figure below.

Application	[Logo] China International Trade Single Window	Application	[Logo] China International Trade Single Window
Imported Food Overseas Enterprises Registration	1st Page		1st Page
Registration Application			
Integrated Query			

Figure   The comparison of menu before and after collapse

2.4.3 Closing Tabs

Click on the display area on the right - click the icon [Close Operation] in the upper right corner, the drop-down menu will pop up (as shown in the figure below). Select "Close all tabs" to close all open tabs in the current display area; select "Close other tabs" to close all other open tabs except the currently displayed tab.

Enter or Exit the System

Visit https://cifer.singlewindow.cn, enter user name, password, login to the system, and enter the main interface of the system. Click the icon [Chinese/EN] in the upper right corner, one can choose the display language of the system.

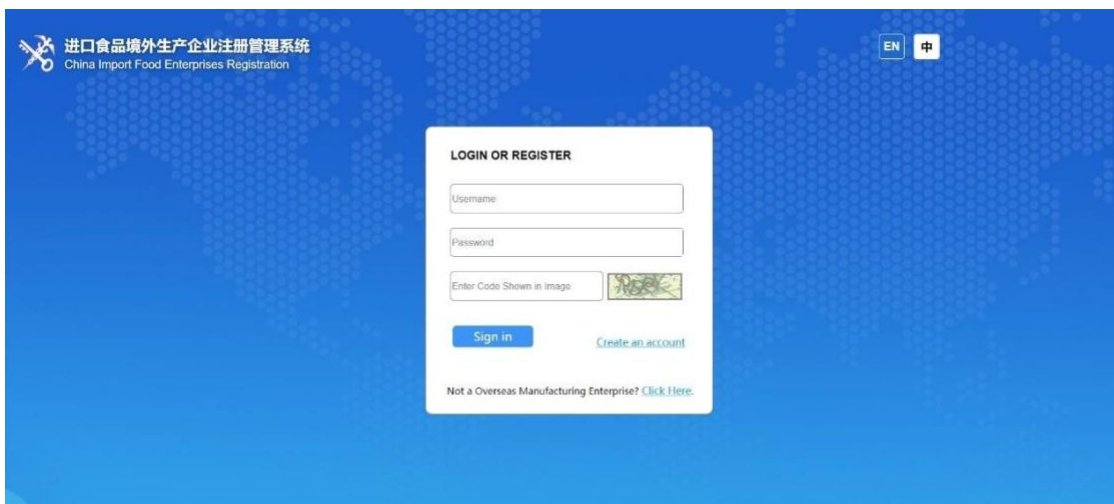

Figure   System Portal

This system supports users from overseas enterprises and overseas authorities. After entering the system, click [Exit] in the upper right corner of the interface to safely exit the system.

CHAPTER 3 SYSTEM INTRODUCTION

3.1 Target Users

A competent authority of the located country (region) (hereinafter referred to as "Competent Authority") is: the official department responsible for the safety and health supervision of the food manufacturers in the country (region) where the overseas manufacturing enterprises of imported food are located. Through this system, reviews and inspects the applications submitted by manufacturers in the locality and makes recommendations to the General Administration of Customs of the People's Republic of China (hereinafter referred to as "GACC"). Conducts administrations of registered manufacturers which have been recommended by this competent authority. Cooperates with GACC in carrying out re-examinations and supervising corrective actions of registered enterprises.

An overseas manufacturing enterprise of imported food (hereinafter referred to as "Enterprise") is: the overseas manufacturing, processing and storage enterprise that export food to China. Through this system, submits an application for enterprise registration, submits materials of corrective actions, and receives notifications from GACC etc.
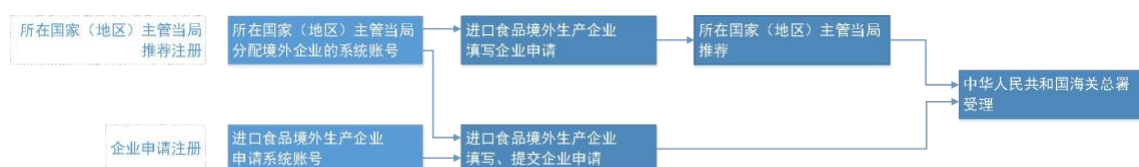

3.2 Function Introduction

The Registration and Management System for Overseas Enterprises of Imported Food manages the registration of overseas manufacturing enterprises of imported food. Its functions include applications for registration, alteration, renewal, and deregistration of overseas manufacturing enterprises, as well as queries on applications; enabling competent authorities to review and inspect enterprise's applications and conducts administration of registered enterprises.

Registration methods for overseas manufacturing enterprises of imported food include registration recommended by the competent authority of the located country (region) and self-application for registration.

The overseas manufacturing enterprises of 18 categories of imported food including meat and meat products, casings, aquatic products, dairy products, bird nest and bird nest products, bee products, eggs and egg products, edible fats and oils, stuffed pasta, edible grains, grain milling industrial products and malt, fresh-kept and dehydrated vegetables and dried beans, seasonings, nuts and seeds, dried fruits, unroasted coffee beans and cocoa beans, special dietary foods, health-care foods, etc., shall be recommended to GACC for registration by the competent authority of the located country (region).

The overseas manufacturing enterprises of imported food other than the above-mentioned 18 categories shall file a self-application to GACC for registration.

				Being accepted and examined by GACC
Self-application for registration	The overseas manufacturing enterprises of imported	The overseas manufacturing enterprises of imported		

	food applies for a system account	food completes and submits a self-application		

Figure   The registration process

CHAPTER 4 USER (ACCOUNT) MANAGEMENT

Depending on whether an enterprise needs the "registration recommended by the competent authority of the located country (region)", the system account of an overseas enterprise user can be obtained by means of allocation by the competent authority and self-application by the overseas enterprise.

With the system account of overseas enterprise assigned by the competent authority, applications for registration of overseas manufacturing enterprise of all categories of food can be made after logging in to the system.

With the self-applied system account of overseas enterprise, applications for registration of overseas manufacturing enterprise of imported food other than the 18 categories can be made only.

Tips:

1. An overseas enterprise can apply for one overseas enterprise account only.

2. *If the product categories involved by an overseas manufacturing enterprise are included in both "the recommended registration" and "the self-applied registration" , it is recommended to contact the competent authority to assign a system account, and it is not recommended to make a self-application for a system account.*

4.1 System Account Assignment By The Overseas Competent Authority

Enterprises are recommended to contact their competent authorities for system account assignment.

4.2 System Account Self-application By Enterprise

Visit https://cifer.singlewindow.cn, click the link of "Create a new account /Create an account" to enter the account entry interface, and complete the account information.

Figure   Product selection in registration application

The overseas manufacturing enterprises of 18 categories of imported food including meat and meat products, casings, aquatic products, dairy products, bird nest and bird nest products, bee products, eggs and egg products, edible fats and oils, stuffed pasta, edible grains, grain milling industrial products and malt, fresh-kept and dehydrated vegetables and dried beans, seasonings, nuts and seeds, dried fruits, unroasted coffee beans and cocoa beans, special dietary foods, health-care foods, etc., shall be recommended to GACC for registration by the competent authority of the located country (region).

The overseas manufacturing enterprises of imported food other than the above-mentioned 18 categories shall file a self-application to GACC for registration.

5.1.1.1 Introduction To The Registration Procedure (Taking plant-based stuffed pasta as an example)

Registration Procedure:

1. General Approving Procedure

Input information -> Preview -> Submit to the competent authority -> Recommendation by the competent

authority -> Approval by GACC (registration number of food in China assigned).

2. The Procedure When Requested By The Competent Authority for supplementary and corrective actions

Input information -> Preview -> Submit to the competent authority -> Competent authority requests supplements and corrections -> Modify the application and resubmit to the competent authority -> Recommendation by the competent authority -> Approval by GACC (registration number of food in China assigned).

3. The Procedure When Rejected By GACC OR The Competent Authority (Denied to recommend)
Input information -> Preview -> Submit to the competent authority -> The competent authority denies to recommend (Please check the reasons for rejection through "Integrated Query Function - Application Query")

Tips:

For applications that are denied to recommended by the competent authority shall not be resubmitted after making modifications to the original application form. However, it is allowed to file a new application again.

The main functions:

1. Save Temporarily: save the enterprise profile, manufacturing-related information, self-inspection, and attachment information currently entered. Data saved temporarily can be deleted or submitted to the competent authority.

Figure   Attachment Information

• Attachment information: the attachments uploaded on the three pages of enterprise profile, manufacturing-related information, and self-inspection are summarized here.

5.1.2 Enterprise Self-Registration

For overseas manufacturing enterprises of imported food other than the 18 categories recommended for registration by the competent authority of the located country (region), shall file a self-application to GACC for registration.

Log in to the main page with the enterprise account, and click on the left menu [Registration Application] to select products that could self-apply for registration to GACC. Take "Alcohol - Distilled Liquor and Its Blended Liquor" as an example for description as follows.

[Logo] China International Trade Single Window			Registration of Overseas Manufacturing Enterprises of Imported Food		Log in to the mobile APP	BBB001	Exit

	Sugars (including raw sugar, table sugar, lactose, syrup, etc.)
	Candy, chocolate (including chocolate, cocoa butter substitute chocolate and its products)
	Seasonings (not including table sugar)
	Roasted coffee beans, cocoa beans and their products (excluding chocolate)
	Fruit products
	Other miscellaneous food
	Chinese herbal medicine
	[Next Page]

Figure   Product selection in registration application

5.1.2.1 Introduction to the Registration Procedure (Alcohol - Distilled Liquor and Its Blended Liquor)

Registration Procedure:

1. General Approving Procedure

Enter information -> Preview -> Submission (to GACC) -> Approval by GACC (obtain the registration number in China)

2. GACC return and supplementation and correction process

Entry Information -> Preview -> Declare -> GACC requires supplements and corrections -> Revise the application and re-declare -> Approval by GACC (obtained the registration number in China)

3. GACC return (registration is not allowed) process

Entry Information -> Preview -> Declare -> GACC is not allowed to register (you can use the integrated query function "GACC receipt" to check the reason for the failure.)

Tips:

If GACC does not approve the registration, it shall not be resubmitted after making amendments on the basis of the original application. However, it is allowed to file a new application again.

The main functions:

Submit: Declare the registration application data to GACC for review.

Other functions such as Delete and Query are basically the same as those of the application page for the competent authority to recommend registered products to GACC.

5.1.2.2 Input instructions

In the interface, the fields with *are mandatory. The following are descriptions of the main fields:

[Logo] China International Trade Single Window			Registration of Overseas Manufacturing Enterprises of Imported Food		Log in to the mobile APP	BBB001	Exit

Figure Enterprise Profile 2

• The registration number approved by the competent authority of the located country (region): backfilled by the system and it is derived from the "Country (Region) Registration Number" when the enterprise user account made registration.

• Name of the registration and approval authority of the located country (region): The name of the authority that grants the qualification of the enterprise in the country where the enterprise is located. (Optional).

• Registration number (In China)/ Registration time (In China) /Validity of registration (in China): The registration qualification number of the enterprise in China granted by GACC after approval. It is not possible to fill in the entry. After the registration application is approved, GACC will give it. The enterprise can obtain the number through the query function of the application form.

•Enterprise name: Completed by the system. Backfilled according to user account information. (Mandatory). Editing operations can be performed here, but modification is not recommended.

• Products to be registered / added in China: mandatory field. After clicking [Add], the entry interface pops up, and multiple product information can be entered.

• Trade with China in the last 2 years: mandatory. If "Yes" is selected, it is required; If "No" is selected, it is not required. Select "Yes" to pop up the form of "Specific products exported to China", and click [Add], and the interface for entering China's trade information for the last 2 years will pop up. The parameter options of "Specific Products Exported to China" come from the "Specific products to be exported to China" filled in "Products to be registered / added in China".

• Export trade in the last 2 years (form): optional. Click [New] - "Export Products" option. Click the space or the triangle on the right to get the parameters, the parameter options of "Specific products exported to China" are derived from the "Specific products to be exported to China" filled in "Products to be registered / added in China".

Figure Application Form Query

Operating procedures:

1. Select the query conditions, click [Query]. According to the query conditions, the query results are listed in the list below.

2. Click the [View] button in the data operation column to open the application form and display the details. You can view the application progress in the upper right corner of the details page. According to the status of the application form, there are the following situations:

(1) For the status of enterprise's Save Temporarily,and Supplementation and Correction, the application forms can be edited, modified and declared.

(2) If products that enterprises can apply to GACC are in the state of " Failed to send to GACC", or " GACC warehousing failed ", it can be edited and re-declared (see the appendix at the end of this article for detailed status explanation). If the competent authority recommends to GACC to apply for registration of products in the status of "Failed to send to GACC ", or " GACC warehousing failed", it cannot be modified or declared.

Appendix: System Status Description

Status	Description
Save Temporarily	Save the input information to the local
Submit (Competent authority)	The application is submitted to the competent authority, waiting for the competent authority to review
Submit (GACC)	1. The competent authority recommends the enterprise application to GACC 2. The enterprise submits the application to GACC
Not recommended	GACC or the competent authority users approve and return the application to the enterprise
Successfully sent to GACC	In the system processing link, the application recommended by the competent authority or submitted by the enterprise has been successfully sent to GACC
Failed to send to GACC	In the system processing link, the application recommended by the competent authority or submitted by the enterprise is not sent to GACC normally due to network or other abnormalities in the process of sending to GACC
GACC warehousing is successful	In the system processing link, GACC successfully received the data
GACC warehousing failed	In the system processing link, GACC failed to receive data
Accept	GACC accepted the application and entered the review stage.
Inadmissible	GACC did not accept the application and did not enter the approval stage, and the application was returned.
Supplements and corrections	1. The submitted application does not meet the requirements, GACC will return the application and request the enterprise or the competent authority to modify the application
	2. The competent authority returns the enterprise application and requires the enterprise to modify the application
Approval failed	GACC rejected the application recommended by the competent authority or submitted by the enterprise
Approved	The overseas manufacturing enterprises of imported food meet the requirements, and GACC shall register and give the registration number in China
Revoked	Initiated by GACC to cancel the registration in China of a enterprise that has been registered in China
Suspended	For registered enterprises, GACC suspends their food exports to China until the rectification meets the registration requirements
Rectified	If an overseas manufacturing enterprise of registered imported food no longer meets the registration requirements, GACC requires it to make rectification within the prescribed time limit, and during the rectification period, the food import of the relevant enterprise shall be suspended. IF the enterprise completes the rectification within the prescribed time limit, it shall submit a written rectification report and a written statement of compliance with the registration requirements to GACC.
